Subject: penalty

to whom it may concern, i feel it is my duty to at least comment on the microsoft penalty faze. i have been using personal computers consistently since 1984. i continue to use apple computers and their software as it is better than microsoft. the problem, or at least one aspect of it, is that microsoft truly does force PC users to use their software. the clearly have abused their monopoly status. they are accused of lying to a European committee investigating these abuses. judge penfield, a conservative reagan appointee, had such strong emotions behind his actions because of these abuses by microsoft.

this current administration is being far too lenient with microsoft. they deserve the most severe penalties and consumers must be assured that they will not be subject to more abuses by microsoft.

yours truly,
jamie aresty
